"Other Tanks" is a game about tanks. Shooting each other. Wow, this game is a piece of

I got a coupon for 90% off (Making it NZ\$0.24 instead of NZ\$2.38) and I still put in a request for a refund.

The game has no purpose, the tanks are overpowered, spawn way too frequently, there is pretty much no way to win and the graphics look like my 8-year old self's drawings.

Did I mention there is pretty much no way to win? You are constantly shooting at tanks, spawning in huge amounts. If every dog in the world got horny as and made a litter of 69 puppies, there would still be less puppies than tanks.

That might be an over-exaggeration but you get my point.

Hey Steam, how's my refund request for NZ\$0.24 going?. This game is pretty fun. Most people have complained of no button to get to main menu, even though all you have to press is Esc. Some People complain that there is no way to save, even though there is a button to save on the top right corner. In my opinion, most people who write bad reviews dont know how to play the game and are way too stubborn to try. The only problem I have with this game is no options menu but, I don't care all too that much about that.. "Other Tanks" is a game about tanks. Shooting each other. Wow, this game is a piece of

10/10 best port from xbox one X. ive spoken with god. he has forgotten us. This is one of the worst games I ever played on steam. The developers couldn't even take the time to make the words fit in the boxes!. How is this a game that was actually accepted?

Graphics are abysmal, the soundtrack is minimal and grainy, the gameplay is barely functioning. Who actually made this?

0/nevernotagainno.

If it wasnt for the badges and cards. Its the only thing that nets this junkware.. No indication of how to win a level. This game is pretty fun.
